KettLiner

Swing wall on the roof

The certified KettLiner beverage body has been proven more than thousands of times. It is operational within seconds; an investment of lasting value, with decades of experience and convincing quality.

opened

TOP ARGUMENTS

✓ **Chain block:**
the robust, precision mechanics is more resistant to high strains compared to the traditional rope system.

✓ **Little roof overhang:**
can be opened even in case of limited room height. The small height of the lower wall allows a low loading edge and high ground clearance.

✓ **Customizable:**
the modular construction offers individual configuration possibilities for front and rear wall.
