

GeBoKit - Assembled body

SideLiner

Swing wall on the roof

The fully automatic superstructure can be opened at the push of a button. It is ready for loading/unloading within seconds and multifunctional in usage; an investment of lasting value, with decades of experience and convincing quality.

TOP ARGUMENTS

- ✓ **Time-saving:**
fast, automatic opening and closing within only 10 seconds. Automatic locking.
- ✓ **Space-saving:**
the lateral space needed for opening and closing the side-wall is about only 520 mm. additionally, low height chassis construction is possible.
- ✓ **Weight-saving:**
the application of lightweight panels increases the payload.
